WORK EXPERIENCE

IMAP Systems Pvt. Ltd., Mumbai

Full Stack Developer

01/2026 - Present

- Working as a Full Stack Developer with experience in ASP.NET, C#, SQL Server, React.js, and Flutter. Responsible for developing and maintaining web and mobile applications, backend APIs, database management, frontend development, and production-level issue resolution for enterprise solutions.

Technoworld Software

FULLSTACK DEVELOPMENT INTERN

07/2025 - 01/2026

- Expanded RESTful APIs using Spring Boot, integrating with MySQL database and leveraging Spring Data JPA for efficient data access.
- Built and tested full CRUD operations with robust form validation, error handling, and structured exception management.
- Created a responsive frontend using HTML, CSS, and JavaScript, and seamlessly connected it to the backend via API integration.

PROJECTS

MedScan AI – Smart Medical Report Management System [🔗](#)

01/2026 - 06/2026

Developed MedScan AI, a full-stack medical report management system enabling secure report uploads, multi-user access, and abnormal report detection. Built using ASP.NET, Node.js, React, and Flutter with MySQL/SQL Server, focusing on scalable architecture and secure data handling.

Square Chat – Real-Time Messaging Application

01/2026 - 02/2026

Developed Square Chat, a real-time messaging and calling application using Flutter, Node.js, and Firebase. Implemented chat with Firestore and audio/video calling using WebRTC, along with authentication, push notifications, and scalable cloud-based architecture.

Online Auction

01/2025 - 05/2025

Developed a dual-user platform for vendors and customers with real-time bidding functionality.

Designed a responsive UI using HTML, CSS, and Bootstrap.

Implemented backend logic using Java (JSP/Servlet) for bidding and user management.

Managed data storage and relationships using MySQL.
